EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows: Please cancel claims 1-9.

Claims 1-9 are directed to a non-elected invention. The election was made without traverse in Paper filed on April 29, 2002.

Allowable Subject Matter

2. Claims 10-16 are allowed.

3. The following is an examiner's statement of reasons for allowance.

Honshima et al. clearly teaches the construction of an armature for an electric rotary machine, the armature comprising:

an armature core provided with a plurality of slots extending in an axial direction and disposed alongside each other in a circumferential direction;

an armature winding inserted in the slots so as to be mounted on the armature core; and

an insulator mounted in each of the slots wherein:

the insulator is disposed between an inner face of each slot and the armature winding; and

first creases are formed on side portions of each insulator.

Shiga et al. teach the construction of an electric rotating machine wherein a first side portion of each insulator are formed shifted toward the bottom of the slot with respect to a second side portion of each insulator, whereby the top ends of the first and second side portions of each insulator, one overlapping the other, enclose an opening of each slot in a manner such that the top end of the second side portion is positioned over the top end of the first side portion for the purpose of improving the resistance to the centrifugal forces.

The prior art of record fails to disclose, alone or in combination, an armature for a dynamoelectric machine as claimed on independent claim 10, wherein the first creases are formed on side portions of each insulator so as to extend in a lengthwise direction of the slot at a slot-opening end of the side portions, the first creases being preformed prior to the insulator being mounted in said slots by first bent parts for angling the slot-opening ends of the side portions so as to be apart from each other.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892.
